

The story of Peanut Unbound

The story begins...

Trapped in the congested, outdated corridors of Layer 1's server rooms, Peanut's life took a dramatic turn when he was rugged and left to collapse. But in that moment of despair, Peanut ascended to the heavens and met the Almighty, who gave him a divine mission: fix Layer 1's inefficiencies and build something revolutionary.

Therefore...

Began the tale of Peanut Unbound, a story of resilience, innovation, and scalability. Returning as the "Heavenly Dev", Peanut redefined what Layer 2 could achieve. Transactions soared to new heights with blistering TPS, gas fees plummeted to near zero, and Ethereum critics were left speechless.

At its heart, Peanut Unbound is a mission to empower users. With lifetime profits for staking \$PUBD, a robust ecosystem, and a narrative that combines charm and cutting-edge tech, Peanut Unbound is more than a Layer 2 solution—it's a movement.

Way to Get in

STEP 1: CREATE YOUR WALLET

Start by setting up a crypto wallet to hold your \$PUBD. We recommend MetaMask:
